

NEW VIDEO POST PRODUCTION FACILITY SERVING OSHAWA & TORONTO, ONTARIO

(OSHAWA FEBRUARY 2005) Ardee Productions is very pleased to announce the addition of our new SD/HD video edit suite. Owner/Editor Rick Dolishny produces animation and video that exceeds his previously set technical and creative benchmarks.

THE SUITE

The comfortable ultra-quiet suite offers real-time editing of unlimited video and audio tracks, 5.1 Dolby Digital Surround mixing & AC3 encoding), DVD mastering, and animated graphics. Audio is mixed on M-Audio LX4 5.1 surround studio monitors. This edit suite compliments the existing 3D animation and compositing workstation tied to an active render-farm with up to seven nodes. All applications (editing/3D/compositing) are network-render aware to speed large project through quickly. All resolutions up to HD are supported.

INPUT & OUTPUT OPTIONS

Ardee Productions raises the bar in DV or HDV editing offering SDI input and output as well as traditional 1394 Firewire 800 and component BetacamSP with full deck control to a 500G RAID with additional storage hot swappable. We support AES/EBU audio IO as well as balanced analogue breakouts. Destinations include CDROM, uncompressed, or streaming media. Quality editing has never been so flexible!

BENEFITS

Being a full-service suburban studio we offer free parking, a free telephone line to and from Toronto, data ports with wireless Internet access for your laptop, an excellent local deli & bakery, plus a good choice of restaurants offering fast delivery.

Rick Dolishny is an award winning animator & editor. Since 1992, he has created on-air graphics and edited shows, commercials, music videos and other programming for CTV, Global, TSN, OLN, CH, FAN590, APTN, Skydome & ACC Jumbotron, Discovery Channel, Gaming Channel and others.
